

I depend on the K-Love radio station because I am not able to get to church and need that fellowship. Living out in the country it plays an important role for my family for hearing the news that is not presented in our local news. The music keeps our spirits up when set backs occur. It keeps us connected as a community hearing the same songs at the same time and knowing that because of that song someone is praying. Hearing the news with children present and knowing it is safe for them to listen to without censoring it. If this station is replaced with LPFM the families that listen to it will be affected, children will lose a sense of peace from the type of music that is no longer there. We would lose the advertisement of local functions because this is the only station that we can get in our area. Please do not replace this station if it is a much needed lifeline.
